

FORS 8020 – Spring 2009

Opportunities in the Bio-Based Economy

1 credit hour Seminar
Open to Graduate Students in Any Major
Wednesdays, 3:35-4:25, 4-517 Warnell

Instructors: Dr. Dale Greene, Forestry; Dr. Joy Peterson, Microbiology
Dr. K.C. Das & Dr. Sudhagar Mani, Engineering

This course seeks to acquaint students from across campus with the full array of opportunities associated with producing electric power, liquid fuels, or other products from biomass sources. This course brings together students with different perspectives on this topic so we can explore the opportunities in this area from as many angles as possible. Speakers will be selected from across campus and from outside companies and organizations that use biomass.

For more information contact Dr. Dale Greene – greene@warnell.uga.edu
